Wegman Design Group completes NCH Pediatric Center's SeaCAREium

NAPLES, FL (July 24, 2008) – Wegman Design Group has completed Naples Community Hospital's newly designed pediatric center, an imaginative and engaging environment wholly unexpected in a hospital where children and parents experience the magic and mystery of the sea.

The SeaCAREium Pediatric Center is located in the tower at NCH North Naples Hospital, 11190 Health Park Boulevard, Naples on the third floor.

Interactive discovery game

The corridor walls are adorned with spectacular, clinically safe fish imagery embedded with an interactive discovery game with 30 hidden starfish.

A playroom at the water's edge

The sunny play room an eight-foot high sandcastle with a built-in flat screen and media storage. Games are cleverly concealed in beach cabanas adorned in brightly painted bric-a-brac.

A lobby aquarium

A life-size diorama aquarium, complete with screen-printed fish and coral on dimensional acrylic, simulates a realistic natural environment. Lighted and imbued with LED movement, this technique creates the illusion of softly lapping waves.

Welcoming nurses station

The nurses' station is enhanced by bubble lights and a school of fish mobile swimming overhead.
